Wifi adapter causes internet to disconnect

2020/09/07

Hi, recently I bought a new gaming PC and I bought a TP Link Wi-Fi adapter to be able to connect to the Internet so I hooked it up to the computer and everything was completely fine. After a while the internet started disconnecting randomly. The signal goes down from full signal to that little dot and then after a moment i get the star icon which says that you are not connected to the internet, and I cannot immediately reconnect because the computer shows that my wifi signal is 0. So I have to wait like 5 10 seconds for the signal to magically come back up so I could connect again. Note 1: the problem started occurring when I started using the wifi adapter Note 2: this issue is effecting all the devices in the house so it's not an issue from the computer Note 3: I tried reinstalling the adapter's driver's What is the problem? Do I need to call my ISP to fix this issue?
