Can someone help me identify why my laptop wifi is so slow?

2020/08/23

I've been trying to troubleshoot this for two days now and I can't figure it out. WIFI download is giving 1-5 mbs, upload however is normal 30-50 mbs. I checked multiple laptops and it's only this one. I checked multiple browsers and they're all giving the same speed. Plugging ethernet into the laptop will make it work perfectly so it's just WIFI. Network adapter is up to date. I don't understand why it's so slow. This started after I swapped my router and modem. Next thing I'm going to try is changing the router back. But I'm still confused why it's just this laptop having problems since the switch. Thanks for reading.
